

- 3** Three-inch powder-coated, light-weight panel shelving gives the display dimension and stability.
- 4** 3DL is the right fit for this fixture in a men's clothing store, offering a clean, smooth look while guarding against the damage that often plagues seams in high-traffic areas.
- 5** A routed MDF background provides the perfect setting for laser-cut lettering that spells out this salon's name.
- 6** Panel products and decorative surfaces are abundant in this retail space. Of particular interest are the profile wrapped profiles used on the walls and ceilings. MDF would be the most common substrate. Light basis weight papers (LBWP) and finish foils are the most common surface materials.

See pages 40-94 for more detailed product descriptions and performance characteristics.
